

## Institutional Policy for Identification of Slow and Advanced Learners

**Academic Year – 2020-2021**

During the academic year 2020-21, the slow and advanced learners were identified through the performance of the previous academic year.

The academic year being the year of lock down due to COVID-19 pandemic, online delivery of academic input was done as per the direction of the University of Mumbai and Ministry of higher Education, Government of Maharashtra.

The academic input was online and the evaluation system was also done online as per the direction of the University of Mumbai and Higher Education Ministry, Government of Maharashtra.

The faculty of the institution conducted not only online teaching but various other modes of software were used for the purpose of evaluating and conducting class tests such as Testmoz, Kahoot, Google forms, Google classrooms etc.

The repeat sessions were conducted as per the needs of the students and therefore no separate evaluation pattern or system of evaluation was followed in order to identify slow and advance learners.
